EDUCATION

Georgia Institute of Technology • GPA 3.76

May 2026 **(B.S.)** | May 2028 **(M.S.)**

B.S. in **Computational Media** (Human-Centered Computing + Interaction Design) + **Minor** in **Industrial Design**

M.S. in **Human Computer Interaction (Accepted)**

Relevant Coursework: *Human Factors in Design, Visual Design Thinking, User Centered Design Methods, Info Visualization, Information Design, Principles of Interaction Design*

SKILLS

Design: Product Design (End-to-End), Interaction Design, Inclusive & Accessible Design, Design Systems & Component Libraries, User Flows & Information Architecture, Wireframing (Low → High Fidelity), Interactive Prototyping, Accessibility-Aware UI Design

Research: Qualitative User Research, Usability Testing & Heuristic Evaluation, Affinity Diagramming, Contextual Inquiry

Design Tools & Languages: Figma, Adobe Creative Suite, Davinci Resolve, HTML/CSS, JavaScript

PROJECTS

Bits of Good

Jan 2026 - Present

Product Designer → iCAN Alliance

- Designed end-to-end gamification flows for a Tamagotchi-style medication adherence web app for children in clinical trials, spanning embedded minigames (Flowerman, Tic Tac Toe, Riddles), feeding flows, virtual pet states, and reward mechanics.
- Created pixel art game assets and character design; led ideation from user flow through lo-fi to hi-fi prototyping in Figma across 5 sprints from core game loops to mobile-responsive layouts.
- Authored Product Usability & Validation Report to guide usability testing with child end users, evaluating game comprehension, flow clarity, and engagement — informing iterative design decisions ahead of deployment.
- Adapted desktop screens to mobile-responsive layouts, ensuring accessibility across device types for a pediatric user base in active clinical medication trials.
- Collaborated weekly with engineers, PM, and EM on design-to-dev handoff and feasibility; participated in iterative critique sessions to refine gamification features.

Daybreak: AR + Companion App

Mar 2026 - Present

UX/UI Designer → FigBuild 2026 Submission

- Designed a dual-system AR and mobile app to help users rediscover novelty in everyday environments through real-time environmental differencing and butterfly-based accomplishment tracking.
- Conducted secondary research and administered user surveys to validate problem space around sensory habituation; led end-to-end design: user flows, lo-to-hi fidelity prototyping, and iterative testing in Figma.

Vertically Integrated Project: Empathy Bytes

Aug 2024 - Present

Media Subteam Lead

- Lead media subteam designing and developing interactive deliverables that communicate Atlanta Olympics research through visual storytelling, overseeing UX-focused project planning across documentaries and interactive Figma prototypes.

Epoch: Science Olympiad Tournament System

Feb 2025 - Apr 2025

UI Designer

- Designed role-based interfaces for Georgia Tech's official Science Olympiad tournament management site; prototyped and refined layouts with the dev team to streamline event coordination, and team registration.

LEADERSHIP

GT Design Club

May 2025 - Present

Community Engagement Officer

- Founded UX/UI and industrial design project teams; guide members through full design cycles from user research to high-fidelity prototyping; advise teams on semester-long validated design projects.

Georgia Tech Badminton Club

May 2025 - Present

President & D1A Team Captain

- Managed 2 open tournaments per semester (80+ participants); D1 collegiate player; raised \$2.5K+ in fundraising.

CSA Traditional Chinese Dance Team

May 2025 - Present

Co-Captain & Choreographer

- Choreograph and teach routines for a team of 12 dancers, leading 5–7 performances per year at campus festivals and cultural events, reaching an audience of 200+ attendees annually.
