EDUCATION

Georgia Institute of Technology • GPA 3.76

Expected May 2028

M.S. in Human Computer Interaction

B.S. in Computational Media + Minor in Industrial Design

May 2024 - Expected May 2026

Relevant Coursework: Human Factors in Design, Visual Design Thinking, User Centered Design Methods, Info Visualization, Information Design, Principles of Interaction Design

SKILLS

Design: Product Design (End-to-End), Interaction Design, Inclusive & Accessible Design, Design Systems & Component Libraries, User Flows & Information Architecture, Wireframing (Low → High Fidelity), Interactive Prototyping, Accessibility-Aware UI Design

Research: Qualitative User Research, Usability Testing & Heuristic Evaluation, Affinity Diagramming, Contextual Inquiry

Design Tools & Languages: Figma, Adobe Creative Suite, Davinci Resolve, HTML/CSS, JavaScript

PROJECTS

Daybreak: AR + Companion App

Mar 2026 - Present

UX/UI Designer → FigBuild 2026 Submission

- Designed a dual-system AR and mobile app to help users rediscover novelty in everyday environments through real-time environmental differencing and butterfly-based accomplishment tracking.
- Conducted secondary research and administered user surveys to validate problem space around sensory habituation and routine monotony.
- Led end-to-end design process: user flows, low-to-high fidelity prototyping, and iterative testing in Figma.

Bits of Good

Jan 2025 - Present

Current Product Designer → iCAN Alliance

- Creating lo-fi wireframes to hi-fi mockups for medication-taking flows, streak progression systems, and onboarding experiences while partnering with Engineering Manager to ensure design feasibility and implementation accuracy.
- Designing drag-and-drop mini-games, emotion-driven pet states, and reward mechanics through iterative design process, participating in weekly critique sessions to refine gamification features ahead of official deployment.
- Conducting user research to inform mobile-first redesign addressing primary user preferences, designing responsive layouts for various screen sizes and creating accessible interfaces for children in medical trials.

Vertically Integrated Project: Empathy Bytes

Aug 2024 - Present

Media Subteam Lead

- Lead the Media subteam in designing and developing interactive media that communicates Atlanta Olympics research through engaging visual storytelling.
- Oversee UX-focused project planning, ensuring cohesive design direction and usability across digital deliverables such as documentaries and interactive Figma prototypes.

Epoch: Science Olympiad Tournament System

Feb 2025 - Apr 2025

UI Designer

- Designed role-based interfaces for Epoch, the official tournament management site for Georgia Tech's Science Olympiad, improving usability for administrators and coaches.
- Collaborated with the development team to prototype and refine layouts that streamlined event scheduling, team registration, and competition coordination.

LEADERSHIP

GT Design Club

May 2025 - Present

Community Engagement Officer

- Founded and organized UX/UI and industrial design project teams, guiding members through full design cycles from user research to high-fidelity prototyping and user testing.
- Led mentorship sessions to enhance design skills and collaboration among members.
- Advised teams on semester-long projects, ensuring teams delivered validated designs.

Georgia Tech Badminton Club

May 2025 - Present

President

- Manage 1-2 open tournaments each semester with 80+ participants and 3+ university teams.
- Oversee and participate in team and club affairs as a D1 badminton collegiate player and coordinator.
- Lead fundraising efforts, successfully raising \$2.5K+ to support team activities and events.
